Description

The NEW ATOM SAVANT is here!

The SAVANT is a blend of Atom's famous derby Boom and Juke urethane on an oversized core with a molded lip. The oversized core not only reduces weight but increases the overall roll (speed). With the increased speed the molded lip plays a big role in ensuring the grip characteristics remain. The original performance derby wheel! Others followed like Radar HALO - employing a lower profile tire, with oversized hub, providing higher roll than the durometer expected response! Sold in 8-packs.

ATOM SAVANT Features:

- Oversized 45mm Core
- 5mm tire with 7mm lip
- 68 grams per wheel (Over 20% weight reduction compared to Boom Solid Core 59x38)

Size: 59mm x 38mm

Hardnesses: 88A, 91A, 93A, 95A

Surfaces: Plastic, Wood, Slick Sport Court

Reviews

Thursday, 12 January 2023

The 91As are a perfect blend of grip and speed on a slick floor. The size and light weight make for easier, faster footwork and smoother transitions.
