## Description

**TSG FORCE V A Kneepads!** The Force V A knee pad is a low-profile, hard cap vert pad but offers the enhanced protection and comfort of an extra layer of Arti-Lage Foam. Hence the 'A' for Arti-Lage after the 'V' model name! Like the Force V an anti-shift silicone printed liner and two adjustable Neoprene butterfly straps provide pro-level custom fit and security, while the extra layer of foam give the pad added form-fitting comfort and protection from bails. Set of 2 Kneepads.

### Features:

- **HARDSHELL CONSTRUCTION** - For maximum safety, TSG's hardshell construction combines a super strong injection moulded outer shell and a shock absorbing EPS inner shell.
- **ARTI-LAGE FOAM** - Arti-lage foam mimics the property of human cartilage with molecular freeflow technology. Soft and flexible at normal use but building a hard protective shell at impact. High performance shock absorption - great flexibility - extremely comfortable - temperature steady
- **MULTI-LAYER EVA FOAM ON AND AROUND KNEE** - EVA provides great shock absorbing properties, stress-crack resistance and low-temperature toughness. It can be used in multi layers and is backed with hard shell caps for a solid performance.
- **REPLACEABLE PE KNEE CAP** - High impact strength and low friction caps for use on rough and concrete ground.
- **PRE-SHAPED DESIGN** - TSG's pre-shaped body protection comes with a pre-bended articulated design for unrestricting wearing comfort and superior fit.
- **STRONG CORDURA FABRIC**
- **REINFORCED AT CRITICAL STRESS POINTS**
- **HORSESHOE SHAPE** - Custom Horseshoe shape that greatly surrounds knees, elbows or shoulders. The compression-moulded foam pad with a raised top part sits perfectly around your protected joints. This shape minimizes shifting and down-sliding to keep your pad in place during action.
- **ENLARGED COVERAGE**
- **ANTI-SHIFT SILICON PRINT**
- **NEOPRENE BUTTERFLY STRAPS**
- **TOP VELCRO 360-DEGREE STRAP** - The strap wraps around the whole leg or arm offering superior fit adjustment, wearing comfort and protection.
- **ADJUSTABLE BOTTOM VELCRO STRAP WITH SNAP BUCKLE**
- **COMFORTABLE LINING**
- **OPEN-BACK DESIGN** - No skate removal needed. Accessible open-back design with comfortable neoprene butterfly Velcro closure for easy on and off.

Please follow these Guidelines for **SIZING**:

## Reviews

Friday, 03 July 2020

The Force V A knee pads have a good grip on the knee thanks to the silicone print and are well padded so that most of the impact is kept away from the knee. Only the stitching feels a bit stiff at the beginning. You have to wear the pads for a while before you find them comfortable. They will protect you from those really hard bails (indoor or concrete), even if your 90+ kg. Anyone who has done a lot of park skating, will know how important it is to have proper protection and these are of excellent quality.
