Description

The Giotto is the stopperless professional rollerskate plate that is winning more World Figure titles than any other! Featuring 7mm axles in the strongest steel available, an ultra lightweight anodized frame and adjustable pivot pins. Provides the most sensitive control, the greatest and absolute fastest response available from any plate! The Giotto is forged from a solid bar of Ergal Aluminum Alloy and is completely CNC-machined. Ergal is one of the strongest and lightest aluminum alloys available, has a lower expansion coefficient and offers the best coiled-spring response. Giotto uses the Roll-Line click action adjustment system with 04 series, 13mm base King Pins, adjustment click-nuts and locking screws. Choose silver or blue trucks, with standard, natural rubber or urethane suspensions, in your choice of hardness. Plates are sized according to wheelbase measurement (from centre of front axle to centre of rear axle) from 120mm to 180mm. If you aren't sure, please ask for advice on selecting the right size for your needs!
