Description

The BONT Prostar Derby Boot is here!
Your skates shouldn't feel heavy or cumbersome or painful. They shouldn't feel like you are wearing anything on your feet at all. Your skates should feel like an extension of your own body. Introducing the Prostar - An Ultra Lightweight roller derby boot designed to be responsive and Super Heat Moldable! The Prostar features high end, heat moldable fiberglass specifically designed for Roller Derby AND fits wider feet better in standard stock sizes! The Prostar is designed with many quality built-in featurs than many others in this category – at a fraction of the price!

Super Heat Moldable
The Prostar boot is made with thermoplastic in the heel. This is especially good for skaters with skinny or wide ankles as it allows you to mold your boot with a hairdryer to obtain a custom fit in under 10 minutes.

Light Weight
Bont boots are manufactured by hand in a process where we build the boot from the inside out by hand laying the fiberglass around the last (plastic foot). This method of manufacturing is extremely time consuming compared to the traditional method of quad boot manufacturing which is done by gluing the upper to the pre made base. BONT's method results in a much stronger and lighter structure.
