Description

The BONT Prostar Derby Skate is here!

The Bont Prostar is a game changer for Derby! This is a high end, heat moldable fiberglass boot with high end wheels and bearings at an entry level price! A strong competitor in the entry-level RollerDerby market the Prostar offers top wheels and bearings, a strong boot outer skin, toe protector, heat moldability, and its weight is much less than skates costing much more! A complete Prostar skate weighs just 1.19kg or 2.6lbs. There are a lot of setups that weight in at 3.2kg or 7 lbs. That is a weight saving of 2kg per foot! Comes complete with **BONT Ignite** Derby plate 20 degree now reinforced with fiberglass, **688 mini bearings** with **FX1 87A wheels** and **BONT waxed laces!**

FX1 wheels + 688 mini bearings

The FX1 is an ultra light weight, ultra high performance wheel. The wheel and bearings combine to create the lightest wheel/bearing combination on the market. The hub is wrapped with premium high rebounding urethane. The bearings come ready to use with light racing oil inside.

Super Heat Moldable

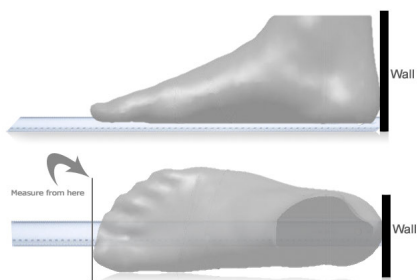

The Prostar boot is made with thermoplastic in the heel. This is especially good for skaters with skinny or wide ankles as it allows you to mold your boot with a hairdryer to obtain a custom fit in under 10 minutes.

Light Weight

Bont boots are manufactured by hand in a process where we build the boot from the inside out by hand laying the fiberglass around the last (plastic foot). This method of manufacturing is extremely time consuming compared to the traditional method of quad boot manufacturing which is done by gluing the upper to the pre made base. BONT's method results in a much stronger and lighter structure.

BONT Boot Sizing

It's critical to get this part right prior to ordering! This size chart shows the exact size of the foot form or 'last' that is used to create each specific size of BONT boots. As a basic rule, most skaters like their boots to be 3-4mm longer than the last. This allows for your feet to grow in length when the boots are tightened. If you like your boots super tight, then just add 1-2mm but be warned, your toes will touch the end and possibly be scrunched. To find your size, place a tape measure on a flat surface up against a wall. Stand on the tape measure with your heel against the wall. If you use a ruler, take into consideration that most rulers have a gap where there are no measurements. Look down and take the measurement from your longest toe. Then use the MM scale on the size chart to find your size...

Bont Size	1	2	2.5	3	3.5	4	4.5	5	5.5	6	6.5	7	7.5	8	8.5	9	9.5	10	10.5	11	11.5	12	12.5	13	13.5
Euro Size	33	34	34.5	35	35.5	36	36.5	37	37.5	38	38.5	39	40	41	41.5	42	43	44	45	46	47	48	49	50	51
Length (mm)	211	219	223	228	232	236	241	245	250	254	259	263	268	272	276	281	285	290	294	299	303	308	312	317	321
Standard Width (mm)	78-87	81-90	82-91	84-93	85-94	86-96	87-97	89-98	90-100	91-101	92-103	94-104	95-105	96-107	97-108	99-110	100-111	101-112	102-114	104-115	105-117	106-118	107-119	109-121	110-122

Here are some examples of mm sizes and the boot size that BONT recommends:

- 253mm + 4mm you should order size 6.5
- 258mm + 4mm you should order size 7
- 273mm + 4mm you should order size 9
- 291mm + 4mm you should order size 11

Ready to Order your New BONTs?
