**BONT Boot Sizing**

It's critical to get this part right prior to ordering! This size chart shows the exact size of the foot form or 'last' that is used to create each specific size of BONT boots. As a basic rule, most skaters like their boots to be 3-4mm longer than the last. This allows for your feet to grow in length when the boots are tightened. If you like your boots super tight, then just add 1-2mm but be warned, your toes will touch the end and possibly be scrunched. To find your size, place a tape measure on a flat surface up against a wall. Stand on the tape measure with your heel against the wall. If you use a ruler, take into consideration that most rulers have a gap where there are no measurements. Look down and take the measurement from your longest toe. Then use the MM scale on the size chart to find your size...
