

INSTOCK! PREMIUM TSG FORCE III A Kneepads

PROTECTION FEATURES

Hardshell construction: Hardshell covered pads reduce friction against the ground in case of a fall. Maximum protection from impacts often associated with potholes, rocks and other objects located on wheel barrels or falls from great heights on concrete or wooden ramps.

K2 Impact Resistor (K2): K2 Impact Resistor provides superior shock absorption of up to 75% impact energy. Flexible and soft in the normal state, it provides with impact the maximum of K2 foam or hard protective shell.

Multi-Taper (M-T) foam: M-T provides great shock absorbing properties, it is more resistant and therefore more long-lasting. It can be used as a replacement for the K2 Impact Resistor for a cost performance.

Ballistic-resistant Kevlar Cap: Kevlar Cap provides strength and low friction easy for use on rough and concrete ground.

Tested and Certified (tested and Certified) standard for All-terrain protection EN 14120:2003+A1:2007

COMFORT FEATURES

Pre-shaped Design: Pre-shaped contoured design for unwinding, ensuring comfort and superior fit.

Horizontal Straps: This strap increases sliding and downward to keep you cool in your riding action.

Resurgence Butterfly Straps: No shoe removal needed. Adjustable comfort straps with compression response to easily secure closure for easy on and off.

Roll Over Design: Roll up and fix straps for the most secure and adjusted fit and keeping comfort.

Top Micro 300° Straps: The straps wrap around the whole limb offering superior fit adjustment, ensuring comfort and protection.

Adjustable Roman Micro Strap with Snap Buckle: Buckled straps allow great ease for adjustment.

Open-back Design: No shoe removal needed. Adjustable with comfortable resurgence butterfly fabric closure for easy on and off.

Description

TSG FORCE III A (3A) Kneepads! The Force III A (3A) knee pad is one of the BEST kneepads available on the market! A low-profile, hard cap vert pad but offers the enhanced protection and comfort of an extra layer of Arti-Lage Foam. Hence the 'A' for Arti-Lage after the 'III' model name! This special flexible and soft Arti-lage foam actually hardens on impact and offers the toughest, hardshell protection available! The Force V A has a unique anti-shift silicone printed liner and two adjustable Neoprene butterfly straps provide pro-level custom fit and security. The extra layer of foam give the pad added form-fitting comfort and protection from bails! This is THE Superior MOVE-UP Kneepad for Derby! Comes as a set of 2 Kneepads.

ALL PREMIUM FEATURES:

COMPLETE IMPACT RESISTANCE:

Special ACF (Arti-lage) impact foam is normally flexible and soft, but when faced with impact, it offers the toughest, hardshell protection. High-density, replaceable PE knee cap offers the utmost toughness and security from impact forces on rough and concrete grounds. Multilayers of ultra-soft EVA foam shields your knees from the shocks and vibrations. Skaters have the extra protection from a compression-molded foam pad with a raised top around the joint area.

HARDSHELL CRASH PROTECTION:

Durable and sturdy pads made of hard shells offer complete protection from cuts, scrapes, and strain-related pain. Hardshell construction offers ultimate protection from friction-related injuries during a fall or from impacts caused by different objects on concrete or wooden ramps or from falls from a great height. Knee pads use heavy-duty tear-resistant nylon to withstand the rigors of the game. EVA foam offers stress-crack resistance and low-temperature toughness.

PRE-SHAPED, HORSESHOE DESIGN:

Force III A pad's pre-shaped design conforms to natural body shape and secures well for a comfortable, close fit. Unique horseshoe shape provides ample coverage over the knees. The horseshoe shape keeps the pad in place, without shifting and sliding during swift motions of the game. The pad design does not interfere much with skating styles, especially crossovers.

COMFORTABLE TO WEAR:

360° top velcro straps offer a tight, yet comfortable fit. Skaters will love the easy on-off capability offered by the versatile open-back design with neoprene butterfly velcro closure. Players can easily put on and take off the pads without removing their shoes. Adjustable bottom velcro straps have concealed easy-snap buckles. The knee pad is reinforced at critical stress points for added protection. The inner surface has a comfortable lining fabric for pleasurable wear.

CERTIFIED FOR SAFETY STANDARDS:

TSG gets it that athletes and professionals do not want any compromise when it comes to safety. TSG safety pads are made with the utmost quality and performance standards to meet the EN 14120:2003+A1:2007 Level 2 standard for the wrist, palm, knee, and elbow protectors. Designed in Switzerland, TSG knee sleeves are tested by an internal team of riders and certified by independent lab testing.
