Description

The S1 Lifer Helmet is one of the best fitting and safest helmets for Skateboarding, Longboarding, BMX, Scootering, Roller Skating and Roller Derby. The Lifer Helmet uses a specially formulated EPS Fusion Foam which allows it to protect your head from multiple low force impacts as well as high impacts. The Lifer Helmet is a certified "multi-impact" helmet and is up to 5x more protective than the soft foam non-certified helmets. The Lifer helmet is a break through design combining the added safety of a CPSC and ASTM certified helmet with the comfort and fit of a non-certified helmet. The S1 Lifer Helmet is the best fitting High impact and Multiple Impact helmet on the market. The S1 Mini Lifer helmet is a scaled down version of the Lifer helmet with a smaller mold and shorter straps, while the Mega Lifer is scaled up to fit larger heads! They all offer the same great protection equally!

S1 Lifer Helmet Specs:

• Specially formulated EPS Fusion Foam
• Certified Multi-Impact (ASTM)
• Certified High Impact (CPSC)
• 5x More Protective Than Regular Skate Helmets
• Deep Fit Design

Sizing Instructions:

• Use a soft tape measure to measure the circumference (around) your head and inch above your eyebrows. Keep the tape straight and level from front to back.

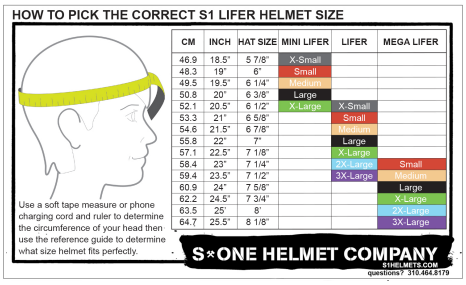

Measuring your head is very helpful to figure out what size Lifer Helmet you will need. It is easiest to do this with a soft measuring tape but if you do not have one you can use a string or a cell phone charging cable and then measure that against a ruler or hard measuring tape. You need to measure your heads circumference and will want to wrap the measuring tape starting in the middle of your forehead and just above your eye brows, then around your head above your ears and back around your head to the middle of your forehead where you started. Put simply you want to measure your head where your hat would normally sit or where you would imagine the helmet to fit on your head just above your eye brows. Once you get your measurement compare it to the sizing charts on the individual Lifer Helmet product pages to see which Lifer will fit you.

If your head measures 18.5" - 20.5" check out the S1 **Mini Lifer** Helmet

If your head measures 20.5" - 23.5" check out the S1 **Lifer** Helmet

If your head measures 23" - 25.5" check out the S1 **Mega Lifer** Helmet

• • And if you are ordering a helmet for someone as a gift it is always a good idea to order a couple of extra sizing liners if you're unsure of their size, order the liners HERE

CM	INCH	HAT SIZE	MINI LIFER	LIFER	MEGA LIFER
46.9	18.5"	5 7/8"	X-Small
